

Your imagination, brought to light.

An innovative and cost-effective way to design and develop OLED luminaires

Combining the glamour of OLED lighting with the art and flexibility of 3D printing technology, Verbatim offers an innovative solution for your luminaire designs. 3D printing enables design and fabrication of intricate shapes and structures quickly and cost-effectively, bringing your imagination to life. Powered by the latest OLED wet-coated panels, and high-quality ABS, PLA and specialty filaments, Verbatim provides you with the ultimate technology to unleash your creativity.
